When Peter Stuyvesant and the Dutch turned New Amsterdam over to the British, the population of the colony included approximately 1,500 Whites, three hundred enslaved Africans, and seventy-five freedmen. By the 1703 census, there were over 3,500 Whites and 600 Blacks in New York County (Manhattan Island) alone. In the early eighteenth century, the price of a young adult male slave was approximately equal to the annual wages of a skilled craftsman. By 1750, approximately 7,500 enslaved Africans had brought into the New York colony. By 1746, Africans made up about 20% of the population of New York City and at least half of the city's households included one or more slaves. People of African ancestry were a higher percentage of the population of New York City than they were of any other area north of Virginia. **Source:** Burrows, E. and Wallace, M. (1999).
