LOCATING BOOKS ON ECONOMICS AT HOFSTRA

June 2009

Introduction

This guide is intended for those who would like to browse through books in economics we have in the stacks of the Axinn Library.

The codes next to each subject heading below indicate the range of call numbers for that heading. For example, HB1-HB849.44 for Economic Theory indicates that books identified as relating primarily to this subject area have call numbers HB1 through HB849.44.

Works focusing on economic issues are found primarily on the fourth and fifth floor of the Axinn Library stacks, although many reference works on economic subjects are found in the Reference Room on the main floor. The range of call numbers contained in each set of shelves is posted on the sides of each shelf. This guide will help you identify the call numbers of the kind of books you are looking for.

While the headings in this guide will direct you to the areas in which you can find most of the books on the listed subjects, relevant material on a particular subject may still be found in other areas. It is always best to check the catalog or to ask a reference librarian if you are doing research and need books on a particular topic.
